

Building an IoT Monitoring System > Introduction to Bolt

How to Hold your Bolt Module

Holding Correctly:

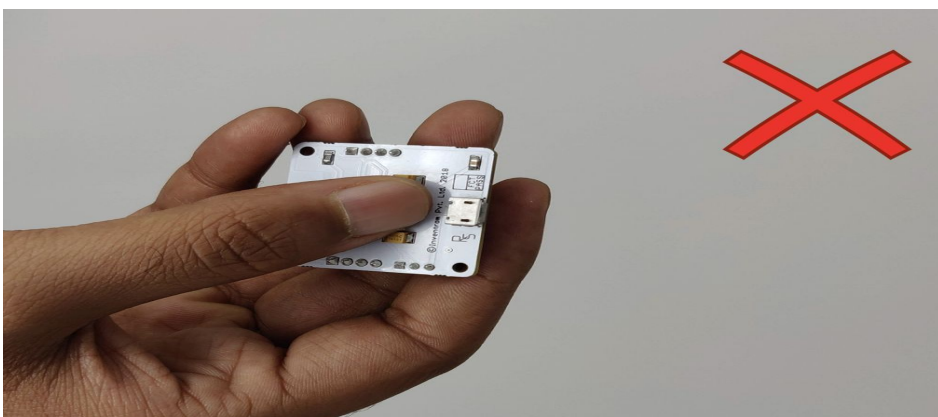

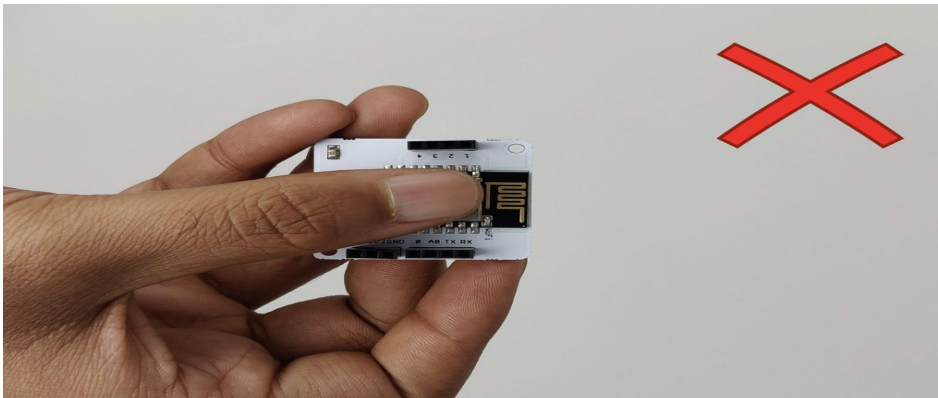

Please hold the Bolt module carefully without touching the Black ESP8266 chip in the centre of the device. You can hold the device by the corners as shown below.

Don't hold like this:

Please do **NOT** touch the Black ESP8266 chip or apply a lot of pressure while connecting/disconnecting wires from the pinouts of the Bolt device. Doing so may cause **IRREVERSIBLE DAMAGE** to the Bolt device and the warranty will be cancelled. We will **NOT** be able to provide a replacement for the same. Please **don't** hold your Bolt as shown Below.
