

Building an IoT Monitoring System > Introduction

Important Information

During the training, you may be stuck at any point. For this, I suggest you scroll below the video or the content and check the Forum section. Here you will find solutions to most of your questions. In case your question is not in the answers given in the Forum section then you can ask a fresh question by asking the same in the space below the forum section. You may also ask the question during the live chat session.

The screenshot displays the Bolt IoT training interface. On the left, a sidebar contains a 'module test' section with 'Controlling Devices Over the Internet' and 'Cloud, APIs and Alerts', and a 'PROGRESS TRACKER' with a bar chart icon. The main content area features a video player with a progress bar at 0:00 / 5:38, a play button, and a 'NEXT' button. Below the video is a 'Forum' section with a search bar and a 'SEARCH' button. A question is listed: 'Q. What is the password of the Bolt device hotspot at the time of setup of the device on the mobile app?'. The answer states: 'This will be covered in the training as you proceed with it. Request you to please follow the steps given in the training one by one and do not skip any steps or try to work on any part before it is covered in the training.' Below the question is a text input field for asking the instructor. A red circle highlights the 'ASK THE INSTRUCTOR' button, which is accompanied by a paperclip icon.

For any non-technical questions related to the course like,

-
1. Training Certificates
 2. Links not opening
 3. Placement section not working
 4. Any documents/videos which are not getting downloaded
 5. Course Extension etc.

Please write to trainings@internshala.com with your query. Do NOT ask about this in the forum or during the live chat session.
