Controlling Devices Over the Internet > Introduction to Javascript

Further Reading

As I had informed earlier, we have only covered the basics of Javascript as part of this tutorial. However, the concepts that you have learned are enough for you to build your IoT Projects.

In past, we have heard the students say that we did not cover all the aspects of Javascript. However, teaching Javascript itself is a full-fledged training course and hence it is out of the bounds of our training to cover it all.

However, if you want to learn more on Javascript we recommend you to check out this tutorial which is free of cost https://www.w3schools.com/js/. It will help you continue your study of Javascript.
